Prometheus for Network Engineers

Or, how to build vs buy your network monitoring

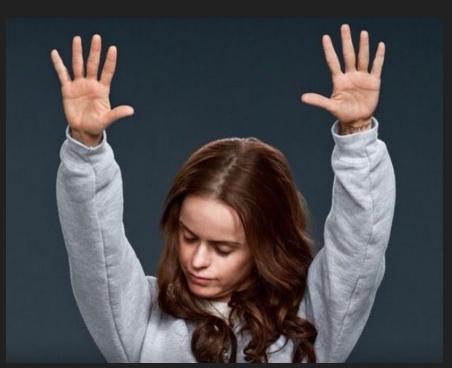

Disclaimer:

This talk will contain a lot of my *opinions*, some may be right, some may not but they're based on my experience and analysis. If you have a problem with that, the price is a beer to come chat about it:)

Who am I?

- Network Engineer (12+ years in MSP/SP/Cloud)
- Background in software engineering / dev
- Passion for monitoring, automation and routing security.
- Unemployed*
